

Synopsis

Suryadatta College of Management Information and Research

Project Title: - Online Pizza Shopping Portal

Name: - Aditya Ajay Chandavale

Introduction: -

Online pizza shopping portal is web application which is used to order the pizza. There are many sites like Dominos, Pizza-Hut and so on. But this web application is useful as it is a customizable application i.e. new features can be added to it.

This project is strong enough for payment gate-way, ordering & delivering pizza and also contains add to cart. As the project is created for academic level it cannot run real time.

Technology and Tools/Softwares: -

- Java (JSP - Servlet)
- Apache-Tomcat Server
- HTML & CSS
- PostgreSQL

Features: -

- Pizza List
- Order Now
- Add to Cart
- Payment Gate-Way
- Customer Login
- Admin Login (This is used to add new pizza into the list.)
